City of Toronto's development applications summary between 2008 and 2021*

Yang Wu

28 January 2021

Abstract

City of Toronto's applicatioin information portal is a web page where you can find information about the new developments in Toronto.The author downloads data set from Open Data Toronto and summarize all the approved applications between 2008 and 2021.For governments, these data provides a overview for them to consider the next step urban planning. For individuals, these data make them aware what infrastructure and new projects are around.

Contents

#Introduction

1 Setup workspace and gather data

In this paper, all the analysis are conducted by R statistical programming language.(R Core Team 2020) Through the **opendatatoronto** package, I download the data set for toronto development applications. This package allows users to download the data set in a reproducible way.(Gelfand 2020) The data are also availavle at this link:https://open.toronto.ca/dataset/development-applications/. In terms of data cleaning, I will use **tidyverse** package.(Wickham et al. 2019) Another two data Visualization packages used in the Exploratory Data Analysis are **ggploat2** (Wickham 2016) and **kableExtra**(Zhu 2020)
